Subject: X Revised draft

Brewster - Here are my comments on the latest X draft. Basically I think it is fine - with some questions:

In 1.5, should we define what the "X Architecture" is? There is no hint of what this means in the agreement.

In 3.4, should it say "license" and not "sell" the technology? or "sell products incorporating the Technology." I have the standard concern that somehow someone within X will think they have the right to sell (i.e., transfer ownership in) the Technology.

5.5 typo on "royalty."

7.4 Is this ok, or should X agree right now that it will put our notices on? Why should we have to request? Let's request now.
